**Next release:** 7<sup>th</sup> June 2013, External trade, January-April 2013 (preliminary)

**Number:** 87

## Industrial production increased by 5.3% in April (Preliminary industrial data, April 2013)

**In April 2013 – according to preliminary data – industrial gross output rose by 5.3% compared to the same month of 2012.**

The index adjusted by working days grew by 2.9%. Year-on-year, output fell by 1.2% in the first four months of this year. The volume of industrial production in April – according to seasonally and working-day adjusted indices – was above the level of the previous month by 1.2%.

Period		Volume indices of gross output in the industry			
		original	from the beginning of the year	working-day adjusted	seasonally and working-day adjusted
		corresponding period of previous year = 100.0			previous month = 100.0
2012	January	100.7	100.7	98.5	101.2
	February	101.2	101.0	96.7	100.0
	March	98.3	100.0	100.6	100.2
	April	97.0	99.3	97.0	97.7
	May	100.4	99.5	102.7	103.6
	June	100.7	99.7	100.7	97.9
	July	100.9	99.9	98.7	99.4
	August	100.2	99.9	102.5	102.6
	September	96.5	99.5	101.0	100.2
	October	98.6	99.4	96.4	96.4
	November	92.9	98.8	92.9	99.5
	December	92.4	98.3	96.7	98.5
2013	January	98.9	98.9	98.9	103.1
	February	94.7	96.7	99.1	100.2
	March	97.1	96.9	99.3	100.4
	April	105.3	98.8	102.9	101.2

*Note: Releases about industrial data are published twice a month. The first release is for t+35 days (preliminary data), the second one is for t+45 days (final data). Detailed information is expected to be published at the forecasted date on the 14<sup>th</sup> of June, from then on data can be downloaded from [Tables\(Stadat\)](#) hyperlink, too*
