## Central Statistical Office

Volume 123

Website: [www.zamstats.gov.zm](http://www.zamstats.gov.zm)

July, 2013

### Foreword

Welcome to the Monthly presentation organised by the Dissemination Branch of the Central Statistical Office (CSO). The CSO embarks on vigorous information delivery strategy to major stakeholders and the media institutions in order to increase utilisation of statistical products and services. The office produces a number of statistical products in the Economic, Social, Agricultural and Environmental areas. The information collected in these areas may be used for various purposes including policy formulation, planning, implementation, monitoring and evaluation of programmes and projects.

This Monthly publication is an attempt to provide highlights of CSO's work and how it can help media institutions and the general public to make use of data and information for sustainable national development and decision-making.

I would like to urge our readers and users of statistical information to send to us any comments that may enhance statistical production and contribute to the improvement of this bulletin.

John Kalumbi  
DIRECTOR OF CENSUS AND STATISTICS

25<sup>th</sup> July, 2013

### Inside this Issue

- **July Inflation remains at 7.3 percent**
- **June 2013 records Trade Surplus**
- **CSO conducts 2013 Non-Farm Informal Sector Survey!**
- **CSO Produces a Public Use file from the 2010 Population Census**
- **Selected Socio - Economic Indicators**

# INFLATION

## July Inflation remains at 7.3 percent

The annual rate of inflation, as measured by the all items Consumer Price Index (CPI) for July 2013 remained the same as that recorded in June 2013 at 7.3 per cent. This means that on average, prices increased by 7.3 percent between July 2012 and July 2013

The Consumer Price Index (CPI) measures changes over time in the general level of

prices of goods and services that households acquire for the purpose of consumption, with reference to the price level in 2009 (i.e. base year 2009 =100).

The rate of inflation for July is the percentage change in the Consumer Price Index (CPI) over the twelve-month period from July 2012 (123.06) to July 2013 (131.99).

### Annual Inflation Rate, July 2012 to July 2013

### Movements in Annual Inflation Rates for CPI Main Groups

Between July 2012 and July 2013, the annual rate of inflation increased for Transport and Restaurant and hotel. The annual rate of inflation decreased for Clothing and footwear; Housing, water, electricity, gas, and other fuels;

Furnishings, household equipment and routine household maintenance; Health; Communication; Recreation and culture; Education; and Miscellaneous goods and services.

### Zambia's Major Export Destinations by Commodity in June 2013

Zambia's major export destination in June 2013 was Switzerland, which accounted for 34.6 percent. The major export products to Switzerland were Cathodes & Sections of Cathodes of refined Copper accounting for 89.2 percent.

China was the second major destination of Zambia's exports accounting for 20.0 percent. The major export product to China was Copper blister (63.8 percent).

The third major export destination was Congo DR, accounting for 12.1 percent. The major export product to Congo DR was Petroleum jelly (33.2 percent).

South Africa was the fourth major export destination accounting for 8.8 percent. The major export products to South Africa were cobalt oxides and hydroxides, accounting for 29.6 percent.

Malawi was the fifth major export destination accounting for 6.9 percent. The major export product to Malawi was Maize (excluding seed) which accounted for 67.8 percent.

These five countries collectively accounted for 82.4 percent of Zambia's total export earnings in June 2013.

## Zambia's Major Import Sources by Commodity in June 2013

The major source of Zambia's imports in June 2013 was South Africa, accounting for 29.0 percent. The major import products from South Africa were Structures and parts of structures of iron or steel, contributing 2.7 percent.

The second main source of Zambia's imports was Congo (DR), which accounted for 15.9 percent. The major import products from Congo DR were Copper ores and concentrates, which accounted for 86.4 percent.

China was the third main source of Zambia's imports accounting for 8.5 percent. The major import products from China were Structures and parts of structures of iron or steel- minlead frames accounting for 11.9 percent.

Other sources of Zambia's imports were Kenya and The United Kingdom, which collectively accounted for 12.6 percent of Zambia's Imports.

## **CSO conducts 2013 Non-Farm Informal Sector Survey!**

The Central Statistical Office (CSO) is carrying out the Non-Farm Informal Sector Survey this year. The first one was done as a component of the Living Conditions Monitoring Survey (LCMS III) in 2003.

This is a nationwide household survey to be conducted in selected areas on the various economic activities that are taking place in the informal sector in Zambia. The survey will be conducted between mid July and mid August 2013.

Over the years, there has been a perception that there is rapid growth of informal sector economic activities in the country. The survey is designed to investigate a number of key questions on

the existence of the informal sector in Zambia.

The main objective of this survey is to collect data that will provide information on, among others, the contribution of the informal sector to the national economy; main economic activities in the informal sector; the proportion of the workforce employed in the sector; proportion of household income generated; and capital investment.

The results will cover various aspects of the informal sector, which include the basic characteristics of the informal businesses and the characteristics of the employees in the sector.

## **CSO Releases a Public Use File from the 2010 Population Census**

Good news to workers in both the public and private sector, academicians, researchers, students and the general public, the Central Statistical Office (CSO) has produced and released a 10 percent sample of the 2010 Census of population and housing for use by data users who would like to create custom tables that are not in the 2010 Census of Population and Housing reports that have been or will be published by CSO. The 10 percent sample of the 2010 census is a stratified random sample of the population which is created by sub-sampling the full census sample.

CSO produces a large number of pre-tabulated data from its censuses and surveys. However, these products cannot meet the needs of every data user. In order to try and meet the needs of all data users, CSO produces Public Use Micro data files so that users can produce their own customised tables which are not in its various census and survey reports.

Public Use Micro data files are untabulated data records that are disseminated for general public use to users outside CSO. Since CSO is mandated to protect the confidentiality of its census and survey respondents, public use micro data files are highly anonymised by removing the names and addresses of respondents and households, and by collapsing geographic and respondent characteristic details to ensure that identification of respondent details is highly unlikely.

The CSO has made it fairly easy to access the Public Use Micro data files. All you have to do is to write a request letter to the Director of Census and Statistics. You also have to state in the request letter what you want to use the data for. These files are available in two basic formats, as ASCII text files with a CSp data dictionary, SPSS, SAS, Stata, and R. Most statistical programs can read files in at least one of these formats.

## **Surveys/Activities being undertaken**

- ☞ Population Projection based on the 2010 Census of Population and Housing
- ☞ 2010/2011 Zambia Economic Census Data Processing
- ☞ 2013 Labour Force Survey Final Report Writing
- ☞ Preparation of the 2013 Zambia Demographic and Health Survey (ZDHS) - Fieldwork

## **Available Reports**

- ☞ 2012/2013 Crop Forecasting Survey (Electronic Copy)
- ☞ 2007 Zambia Demographic and Health Survey (ZDHS) (Electronic and Print copy)
- ☞ 2010 Census of Population and Housing National Analytical and Descriptive Tables Reports (Electronic and Print copy)
- ☞ 2010 Census of Population and Housing Summary Report (Electronic and Print copy)
- ☞ 2006/2010 Living Conditions Monitoring Survey Report (Electronic and Print copy)

### Notes:

1/ Stocks expected to be held by commodity traders, millers, brewers, FRA, DMMU and commercial and small scale farmers as at 1st May 2013.

2/ Production estimates by MAL/CSO. Cassava production is based on the total area under cassava, using an annual yield figure of 11.7 tonnes per hectare (MAFF Root and Tuber Improvement Programme, 1996). A flour extraction rate of 25% is used. Other tubers are sweet potatoes and Irish potatoes.

3/ Human staple food consumption represents 70% (1,470kCal/person/day, CSO) of total diet (2,100kCal/person/day, National Food and Nutrition Commission) for the national population of 14.58 million people (based on CSO Census projections with 2.8% growth rate projected to October 2012, midmarket. The food balance shows an overall surplus of staple foods. Food prices may affect the level of food consumption.

4/ National strategic requirements expected to be carried over into the next season by FRA. (This amount of 500,000 Mt includes equivalent quantity that is already budgeted for).

5/ Estimated requirements by major stock feed producers.

6/ Estimated requirements by industrial breweries.

7/ Estimated retention of grain for other uses by smallholders.

8/ Post harvest losses are estimated at 5% for grains, sweet potatoes and cassava, in line with estimates from other SADC countries.

9/ Structural exports represents cross-border trade, mostly to the DRC, that occurs on a continuing basis and that is likely to occur during the 2012/13 marketing season. It does not include large-scale formal trade.

10/ Expected surpluses or deficits that arise after meeting minimum overall staple human consumption requirements as well as industrial Requirements.

The total surplus/deficit is expressed as maize equivalent using energy values.

The rice deficit is based on a 3 year rolling average of what is known to be imported each year, as indicated under D.

For cassava, the surplus represents cassava that is still in the ground and may not necessarily be harvested.

11/ Commercial imports/exports represent expected regional and international trade by the private sector.

12/ Total estimated requirement for food relief among vulnerable groups, to be imported. This could be met with maize or other grains.
